

# Hydrogen Informer

Hydrogen Informer (H2i) is a web-enabled subscription service designed to monitor and anticipate how the low-carbon hydrogen and ammonia markets are evolving.

Subscribers can access:

- **Renewable Insights** are excerpted from the monthly Market Perspective Reports (MPR), where our experts analyze market trends and forecasts for the energy sectors, with a focus on hydrogen and renewable fuels.
- The **News** section compiles the most important news of the week, selected and curated by our team.
- **Reports** explore the drivers of market changes: technology progress, regulations and policies, ESG trends, etc.
- Our unique **Levelized Cost of Hydrogen (LCOH) and Ammonia (LCOA) models**. LCOH and LCOA are given by country, for green (renewable), blue (low-carbon) and grey products and updated every month.

*The content you are trying to access is for subscribers only.*
